ODS eInterOfficeMail™ helps control shipping expenses by allowing shippers to shop for the best rates. Since eInterOfficeMail parcels are consolidated with other items from point-to-point in one box (FedEx, UPS, etc.), per items costs are reduced significantly.

Consolidated Shipments

ODS eInterOfficeMail™ can reduce shipping expenses significantly for intra-company shipments. Because each eInterOfficeMail™ parcel has a unique tracking number, they can be tracked just like a FedEx or UPS package. Shippers and recipients have online visibility to package status from consolidation at the origin to distribution at the destination, and even while the items are in transit with the common carrier!
